

Corn harvesting

At Abe Farm in Kitahiroshima, try your hand at harvesting corn.

The farm owner will teach you how to find and pick the best ears, so that even beginners can participate.

Corn is best when picked and eaten raw. Of course, it can be eaten boiled.

You' ll never forget the taste of farm-fresh corn.

The owner speaks English, so there' s no need to worry about communication issues. The season is from late August to early October.
